

October 3, 2023

Good morning, I.S 201! This is Nicole from class 851 here for Talk A Lot Tuesday on behalf of the S.E.A.L. Team.

Ever have your laptop break down out of the blue, or watch your internet load agonizingly slowly? Maybe the deadline for your project is looming over you, and you can't seem to find a way to get your presentation app running. If any of these situations sound familiar to you, it might be time to start getting a little more tech-savvy. Today's a great day to get started, because it's National Techies Day!

What is a techie, you might ask? A techie is a person who is deeply interested in or an expert about technology. In this day and age, technology is growing more and more important. National Techies Day is a celebration to encourage students to look more into a profession in technology. It's a way to shed light on all the opportunities available in the tech industry, and acknowledges the importance of technology in today's society.

National Techies Day also honors and appreciates the techies who keep the world progressing with their new and creative innovations. There are many types of tech-related jobs and occupations that you might have not

thought deeply about before. There are software developers, who work behind the scenes to maintain the programs that run on your devices. Software development is mainly concentrated on coding and catering to your devices' needs. Another tech job is a web developer. Web developers construct and design websites and keep them up to shape. One job you might not have thought of are information security analysts who utilize programming skills to protect your data and ward off security breaches.

You can celebrate National Techies Day by learning more about and building an interest in technology. Share your own experiences with technology and help inspire others to become fascinated with the inner workings of technology themselves.

Thank you for listening, and have a Totally Techie Tuesday!

SEAL Team pledge:

We are the Dyker S.E.A.L. Team

Positivity is our dream

We teach it every day

To help others live the optimistic way

We learn to control our emotions and feelings

So, we always have effective social dealings

No stone left unturned; no person left behind

Every member of our team has the power to be kind

We spread kindness to our friends, families, and those who need a smile

When facing hardships and adversity, the S.E.A.L. Team goes the extra mile
